DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 11 rejected under 35 U.S.C. 102(b) as being anticipated by the Romanian patent No. RO 66833. The Romanian patent discloses a tungsten recovery from scrap cermet which comprises grinding and smelting which results in a composition consisting essentially of ground cermet which is to be smelted which anticipates the claimed feedstock.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 2, 3, 12, 13, 20 to 22 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over the Romanian patent No RO 66833 in view of Ray et al (US 6,423,204). The Romanian patent discloses a method comprising grinding and smelting scrap cermet to recover W but does not disclose the source of the scrap cermet as being an anode but Ray et al discloses a cermet inert anode may contain W (col.4, lines 32 to 40) it would have been obvious to one of ordinary skill in the art at the time the invention was made to treat an anode containing W by the Romanian process the motivation being to recover W a valuable metal.

Double Patenting

Claims 1-3, 5-13 and 15-24 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 5-8, 11, 15-18, 22 and 24 of copending Application No.10/387,505. Although the conflicting claims are not identical, they are not patentably distinct from each other because '505

claims a smelter feedstock composition with a fluxing additive which includes an agglomerate.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
